

Importance of "Bija Mantratmak Sri Suktam"!

By Sri Sadguru Sivapremanandaji

Video Link: <https://youtu.be/lcSLmxXHbVY?si=LQo2ermsRVFiOYDC>

Sri Suktam one of the very powerful Vedic technology to bring abundance, to bring harmony, to lift us in all state of consciousness and help us to solve our problems. And this Sri Suktam in Vedas if you see these are the two things in Rig Veda. One is Purusha Suktam and another one is Shri Suktam. Purusha Sukta is very powerful. It will invoke the consciousness and Shri Sukta invokes the energy, Shakti. Shiva is invoked with Purusha and Shakti is invoked with Shri. So there we call it as for Purusha we call it as the ultimate Parabrahma Swarupa and here Shakti we call it as Para Shakti. For that we call it Sri. Sri means, you see that, in Sri Vidya also we don't say, Lalitambika. We just call Sri Vidya. There is no male or female here. Please understand. Sri Vidya means, it's a sadhana, nirguna, nirakara, Parabrahma sadhana of, that we call Sri Vidya Ultimate it is. In the beginning our mind cannot understand that formless state, so we need a form. Then we worship Raja Rajeshwari. With the help of form we reach the formless state. So Shri Suktam is directly connecting to that formless source of energy of Parabrahma Tattva. Is it clear to you? That is how Vedas have explained it. Vedas have explained. And very important about these Vedas is, or these Shlokas or Stotras is every Shloka and Stotra is programmed and kept with a certain energy. For example in Shri Suktam we have 15 Shlokas or Suktam. Suktam is right way of saying or positive way of saying about the Divine admiring and all. We call Sukta. So here 15 Shlokas are there. These 15 Shlokas are representing the 15 phases of the Moon. From New Moon to Full Moon, all the energy of that we are going to invoke by chanting the Shri Suktam. This is very important. How I can connect to the Moon and all phases of the Moon and bring that energy into my soul? If that is the question, the answer is Shri Suktam. How I am going to connect with the Surya and bring His power into my soul? The answer is Aditya Rudhyam. How I can connect to all the 27 Nakshatras and bring that power into my soul? What is the answer? Purusha Sukta. How I can activate all the Shaktis, all the Agni Tattva in my soul and outside? Then the answer is Vishnu Sahasranama. How I can bring Bhu Mandala Shakti, Surya Mandala Shakti, Nakshatra Mandala Shakti and Chandra Mandala Shakti in my soul? What is the answer? Lalita Sahasranama. You see that? This is the technology. You are reading that it is just a name No. Every name behind that programmed intelligence is there. Behind every Shloka, there is a packed energy that will connect you to Divine

Source. You see, these Masters, they don't just utter the names. They have uttered by connecting, receiving and channeling that energy. So these are tested things that if you are sensitive, then only you know. Otherwise it is very difficult. You need to be little bit kinesthetic, you need to be clairvoyant, clairauditory, then you can understand what is spirituality and what mantra gives what effect, what stotra gives what effect. And today we are going to invoke this Sri Suktam. This is very important from new moon to full moon day, from full moon to new moon day, because this Shakti, what we call Chandrakala. Shakti means Chandrakala. Whatever we call with Shiva, Shiva energy, we call it as Suryakala. Then when we do the balanced Shakti and Shiva, when they merge together, there is a formless Agni that created, then we call it as Agnikala. So we have a Shiva, we have a Shakti, at the center we have a Sushumna Nadi, Agnikala. That is what is the inner Agni, inner fire, Kundalini Shakti. Inner fire is Kundalini Shakti. So these are all powers of these stotras, shlokas that we are going to learn, that we are going to use to solve our problems, to solve our problems. Here, this is very important. Here Divine Mother, in a Lakshmi Tantra, makes it very clear that, when somebody chants this Sri Suktam, I personally takes care of their desires. I will full fill their desires. That is a promise from Divine Mother to Indra. Lakshmi is giving a promise to the Indra, that if somebody do this, then I am flowing to their soul, I am dissolving their karmic baggages that are responsible for their problems, so that they can experience the health, experience the abundance, abundant money flow, loving relationship and all that in your life. Is that clear to you? So this is how Divine Mother has explained. And here, we have gone in a more, one more advanced stage, where the each shloka, if I concentrate the energy of each shloka is called as a Bija Mantra. Means it is a everything entire blueprint of that shloka is in that Bija Mantra. So we are going to do Bija Mantra of Shri Suktam. It's very powerful. It's a more powerful, more advanced, than just chanting the Shri Suktam. So and also, if you see in this notes, here we are invoking Divine Mother at all levels of Her existence. For example, Divine Mother as a Mahalakshmi, Her energy is different. Divine Mother as a Lakshmi, Her energy is different. Divine Mother as a Kamala, Her energy is different. So the conscious levels, energy levels of these three forms are different. You see Lakshmi Herself, again I have 8 forms. You see that, Her energy is different, Her application is different, Her meditation is different, Her mantra is different. So like this, here all 15 energies of Lakshmi you are invoking, complete. All 15 Siddhis or Shaktis of Lakshmi's will be coming to your soul. That is the power of Shri Suktam.
